## Foreword

WE are exceedingly gratified to be able to present this year our 10th Anniversary Catalog. Our business has grown tremendously since we first issued a list 10 years ago, and to this fact we are greatly indebted to our good customers. We have tried through these years to bring to you the finest varieties available and to furnish only the highest quality bulbs. We aim to continue this policy.

If you are a newcomer to our mailing list or have not seen fit to order from us before, we hope that you will try our bulbs this year. We will do our utmost to please you.

If you are growing glads to sell as cutflowers we highly recommend getting a start in some of the newer varieties as they will sell readily and command top prices, when older varieties go begging. A start with small bulbs or bulblets will put you out in front.

We have added a number of new varieties this year that we believe are superior and that you may care to try. We are listing for the first time a few of the Holland varieties that are really fine. We have a considerable list of New Introductions this year but they are highly recommended and thoroughly tested from hybridizers of high regard.

This year, due to the increasing cost of producing and marketing bulbs, I am attempting to hold my costs to a minimum and to give greater value to my customers. Hence I do not have a colored cover and as an elaborate a catalog as in previous years, but believe that passing this savings on to you with high quality bulbs priced reasonably will be more appreciated by you than a lot of fancy display which after all will not make your garden any brighter. Our main objective is to give you the finest varieties, quality grown, at the lowest possible prices.

We have attempted to make our descriptions of varieties as accurate as possible, and as they grow for us they are all very worth while, and should do exceedingly well if ordinary gardening practices are followed. The latest cultural directions are included with each order.

Sincerely,

G. V. SNYDER.

### SIZE OF BULBS

**Large Bulbs** are 1¼" in diameter or more, and give the largest spikes.

**Medium Bulbs** are ¾" to 1¼" in diameter. These bloom excellently, often as well as large, but somewhat later.

**Small Bulbs** average ½" in diameter and often bloom, but with smaller spike.

**Bulblets** — The little hard shelled cormlets from which bulbs are grown.

### THIS LIST SUPERCEDES ALL PREVIOUS PRICE LISTS

Early orders save you money, and you are sure to get the varieties you want as some varieties and sizes are always sold out towards spring.

In addition to discounts we always give overcount or additional extras. Please suggest a few. The larger the order and the earlier they are, the more generous we are with extras.

All stock offered and orders accepted subject to prior sale. Prices subject to change without notice.

Orders for bulblets cannot be accepted after April 20th as we start planting then.
